ARIC™ Risk Hub SaaS

Leverage award-winning enterprise fraud and financial crime prevention while reducing your total cost of ownership and burden on your IT teams

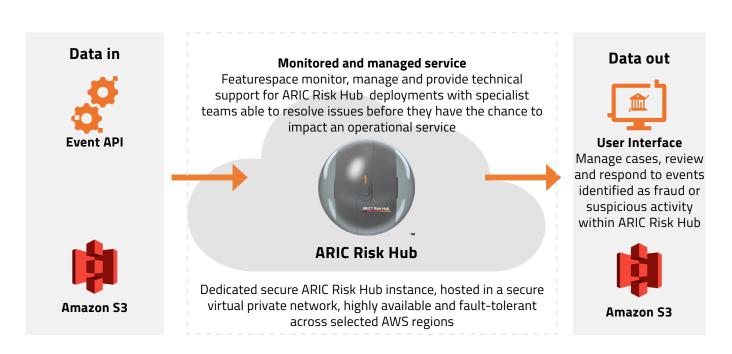

Your IT department delivers operation-critical functions within your business having to deploy complex solutions with powerful capabilities to perform the tasks that are crucial to business outcomes.

To keep service running with minimal disruption to the business, can require significant investment in the extensive training or recruitment of highly skilled IT teams, software and/or hardware. ARIC™ Risk Hub Software as a Service (Saas) enables customers to optimize their technical resources, reducing the dependency on specialist skills, individuals, or teams.

Fact Sheet

The cloud-based instance of the ARIC Risk Hub, is securely deployed and segregated within a Featurespace operated cloud, enabling greater control and predictability of deployment, integration, routine operation and maintenance costs.

Deploy and scale rapidly

Leverage the expertise of Featurespace support and operational teams for market leading capabilities while reducing complexity in configuration while maintaining control and responsibility over specific aspects such as the data sent to the platform and 3rd party integrations such as single sign on (SSO).

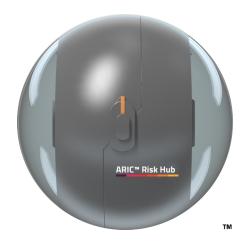

A team of Featurespace experts will assess your on-premise installation, including integrations with other on-premise solutions and data set size to deliver an estimate and plan for migration to an ARIC Risk Hub SaaS deployment. Featurespace will conduct a security assessment and advise to ensure optimal conditions are met and assist in providing process and technical documentation as required by regulators.

Cloud-based instance of ARIC Risk Hub

- Secure, segmented and isolated deployment
- Dedicated Cloud Operation and Support teams
- Installation, ongoing management, system, analytics monitoring and support by Featurespace
- 99.95% production availability
- Core ARIC Risk Hub capabilities
- Configuration available through UI application
- Mature integration points for data in, data out and UI authentication

Compliance and Security

- Conforms to industry-leading global security standards, certification, and accreditation
- PCI-DSS certified AWS environment (assessed yearly by an external Qualified Security Assessor)
- SOC 2 Type 1 compliant
- Data residency compliant (US, UK, Canada, and EU)
- Open Web Application Security Project (OWASP) assessed
- Dedicated security function responsible for monitoring and analyzing security alerts, infrastructure-level and application-level vulnerability scans and penetration testing performed by externally qualified specialists within the card payment industry
- Encryption in transit ARIC™ supports TLS 1.2 throughout to secure all data exchanges and via its data connectors for ingesting data from remote locations
- Encryption at rest Hardware hosting ARIC Risk Hub data store components are encrypted at disk and OS level
- PAN Data eliminates the need for customers to send any untokenized Primary Account Numbers (PAN) data to ARIC Risk Hub

Key Benefits

Reduce Costs

Reduce TCO by eliminating hardware and operational maintenance fees including hidden costs such as firmware updates, operating system patches, upgrades and data center or environment capacity management and planning. Reduce cost further by reducing your compliance burden, Featurespace SaaS is PCI-DSS compliant and SOC 2 certified.

Increase Operational Efficiency

Offload the operational burden of platform maintenance and multi-discipline technical and support resources. 24x7 support, our team of experts monitor, manage, and provide technical support to customers through our online portal, email, or over the phone.

Go-Live Rapidly

Reduce time to go live by73%. ARIC Risk Hub SaaS eliminates the need to create large multi-discipline project teams, onboard new suppliers, procure hardware, or stand-up complex infrastructure.

Maintain Compliance and Mitigate Risk

ARIC Risk Hub SaaS facilitates proactive and transparent delivery of patches, upgrades and fixes ensuring your environment and data remains safe and compliant.

Optimize Uptime

Achieve 99.95% Service Level Availability (SLA) (excluding scheduled downtimes) through a highly available platform and resilient deployment architecture coupled with proactive monitoring and management of the platform.

Get in touch to discover how Featurespace can help you reduce your market share of fraud and bring down business risk and cost.
